

Looking Beyond Activity Labels: Mining Context-Aware Resource Profiles using Activity Instance Archetypes (Demonstration)

Authors: Gerhardus van Hulzen, Niels Martin, Benoît Depaire

Attribute	Description
Phase	The phase within the process. Derived from the “concept.name” attribute, where the first digit of the last part expresses a phase within the process. A total of nine phases are present: Phase 0 – 8
Resource	he unique identifier of the resource who executed this activity instance, e.g. “560462”
Case Procedure	Either <i>blank</i> (no value), “Regulier” (regular), or “Uitgebreid” (comprehensive)
Case Status	Either “G” or “O”. We filtered out “T”, because this only applied to two cases across all logs
Weekday	Number indicating the day of the week, starting with “1” for Monday. Derived from the timestamp indicating when the activity was completed
Case Parts	The category/ies the application relates to. Derived from the “(case) parts” attribute and transformed into dummy variables. An activity instance applies to at least one category, but multiple categories could be applicable. Some categories were aggregated to limit the number of variables, e.g. everything related to environment was bundled into one dummy. A total of fourteen categories are present, although not every municipality dealt with all categories: “Aanleg” (installation), “Bouw” (construction), “Brandveilig” (fireproof), “Flora en fauna” (flora and fauna), “Gebiedsbescherming” (area protection), “Handelen in strijd met regels RO” (acting in violation of spatial planning rules), “Inrit/uitweg” (entrance/exit), “Integraal” (integral), “Kap” (tree felling), “Milieu” (environment), “Monument” (monument), “Reclame” (advertisement), “Roerende zaken” (movable property), and “Sloop” (demolition)

Amount of clusters: where the BIC bends (no significant improvement anymore) and no cluster should be smaller than 5%

Activity instance archetypes:

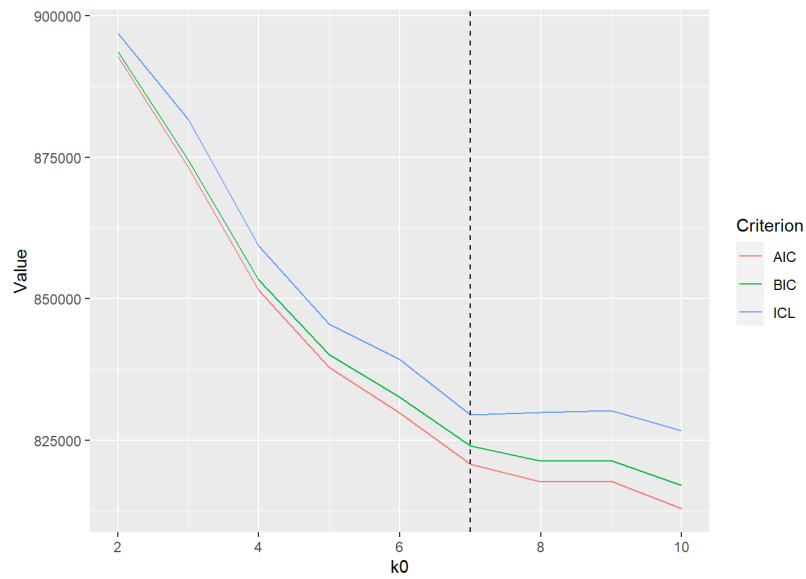

- Phase: add until 70%
- Weekday: Monday+Thursday+Friday = “beginning/end of week”, Tuesday+Wednesday = “midweek”, Saturday+Sunday = “weekend”

Specialism:

- Either 1 or two activity instance archetypes (>70%, rest < 10%) + at least one group with 50%
- All resources in 1 clusters should satisfy

Municipality 1

Activity instance archetypes:

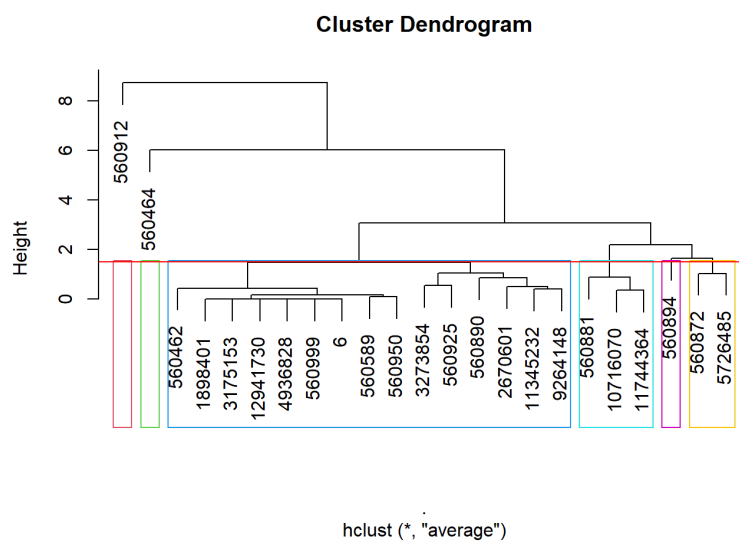

Clust	Label	Description	Size (%)
1	Environment cases	Mainly occur at the beginning/end of the week, more likely require a comprehensive procedure, with typically a “G” case status	8.97%
2	Tree felling cases	Mainly occur at the beginning/end of the week, always have a “blank” procedure, with typically status “G”	7.83%
3	Construction cases in phase 0	Mainly occur at the beginning/end of the week, typically have a “blank” procedure, and are evenly split between status “G” and “O”	17.95%
4	Construction cases in phase 4,5	Occur evenly across the week, typically have a “blank” procedure, and are evenly split between status “G” and “O”	17.77%
5	Other construction cases	Occur evenly across the week, typically have a “blank” procedure, and are evenly split between status “G” and “O”	34.19%
6	Other cases	Occur evenly across the week, typically have a “blank” procedure with status “O”	8.09%
7	Demolition cases	Occur evenly across the week, typically have a “blank” procedure with status “G”	5.20%
